DETAILED ACTION

***Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-25 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-14 of copending Application No. 09/758,321. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1-25 of instance application are *similar in scope* to the claims of Application No. 09/758,321 with *obvious wording variation*. For example:

Regarding claims of instance application, in the claims of U.S. Patent Application No. 09/758,321 claimed for a telephone terminal for used for a key telephone system comprising a main unit which connects the telephone terminal to a telephone network, the terminal comprising: a transmitter configured to *transmit a type signal to the main unit at a first unit speed* in response to a type query signal transmitted from the main unit at the first speed; and a mode setting device configured to *change a transmission speed to the second speed* in response to a speed change request transmitted from the main unit.

Art Unit: 2643

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

***Conclusion***
